Using EVERNOTE to Organize Genealogical Research

EVERNOTE is gaining popularity with Genealogists who prefer to keep genealogical notes organized on the computer in one digital place.

EVERNOTE combines web clipping and note-taking in an organized FREE computer program (Tablet and smart phone versions available).

Also, sounds like you can share notes with other researchers and relatives, perform text-recognition of images to make them searchable, annotate images using something called Skitch, set up tables, and more.

To learn more about this program, join an Evernote for Genealogist Webinar with Lisa Louise Cooke.

Date: Thursday, July 25, 2013

Starting Time: 7pm EST/6pm CST/5pm

MST/4pm PST

Presenter: Lisa Louise Cooke

Duration: 1 hour

Genealogy Glossary – A few useful terms that may be new to some genealogist readers.

Ahnentafel

A German word meaning "ancestor table." This system of numbering gives each ancestor a number and makes organization and reference easier. Fathers are even numbers, mothers odd. To find a father's number, double the child's number (if you are #1, then, your father is #2). Add one to the father's number to get the mother's number (your mother would be #3).

Bureau of Land Management General Land Office (GLO)

The US government office historically in charge of disposing of public land. Usually, several branch land offices existed for each state. Its Web site contains a searchable database with millions of digitized federal land patents.

Cluster Genealogy

Studying your ancestor as part of a group, or "cluster," of relatives, friends and neighbors and associates. The cluster approach can help you find (or confirm) details you might miss by looking only at an individual ancestor.

New England Historical and Genealogical Register System

A genealogical numbering system showing an individual's descendants arranged by generation. All children in a family get Roman numerals (i, ii, iii ...) and every child later listed as a parent also gets an Arabic numeral (2, 3, 4 ...) so you can easily trace a family line from generation to generation. Named for the journal of the New England Historic Genealogical Society.

Vivandière

A woman who followed a military regiment as a sutler or canteen keeper. Though exact numbers are unknown, many women served in this capacity during the American Civil War.

Draft Registration Cards Are Not For Just Those Who Served

Remember that draft registrations were meant to include all men who were eligible to be drafted. These registrations do not include only men who were drafted, but all those who usually were within a specific range of ages at the time of the registration. In the United States there were the largest registrations during the Civil War and World Wars I and II.

YOUR ANCESTOR'S BIRTH DATE TELLS YOU WHAT WARS HE MAY HAVE FOUGHT IN.

TIP--The Neighbors of Every Sibling

The "trick" to locating one ancestral sibling was to look at each sibling in every census and "say out loud" the names of the neighbors. That was when we realized that the married sister was "right under our noses" with a rendering of her last name that was difficult to transcribe and impossible to find with creative soundex and wildcard searches.

Sometimes you just have to look at the other names one by one and think "could this sound like" the name for which I'm looking?

TIP—Five Year Gap

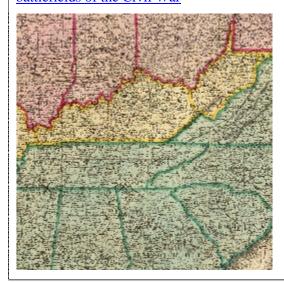

If you have a chronology for an ancestor and, during their adult lifetime, you have five year gaps where you are not certain where the ancestor lived or what they were doing, try and locate a record to provide that information. Answering those questions may help you determine more about where the ancestor was from and what her origins were.

- Did they head west?
- Were they in an institution?
- Did they have a financial setback?
- Did they have a "short-term" marriage that did not last?

Pinterest Genealogy Tips and Tricks
